Round A — Host + 1 guest

1. Open Terminal in the project directory.

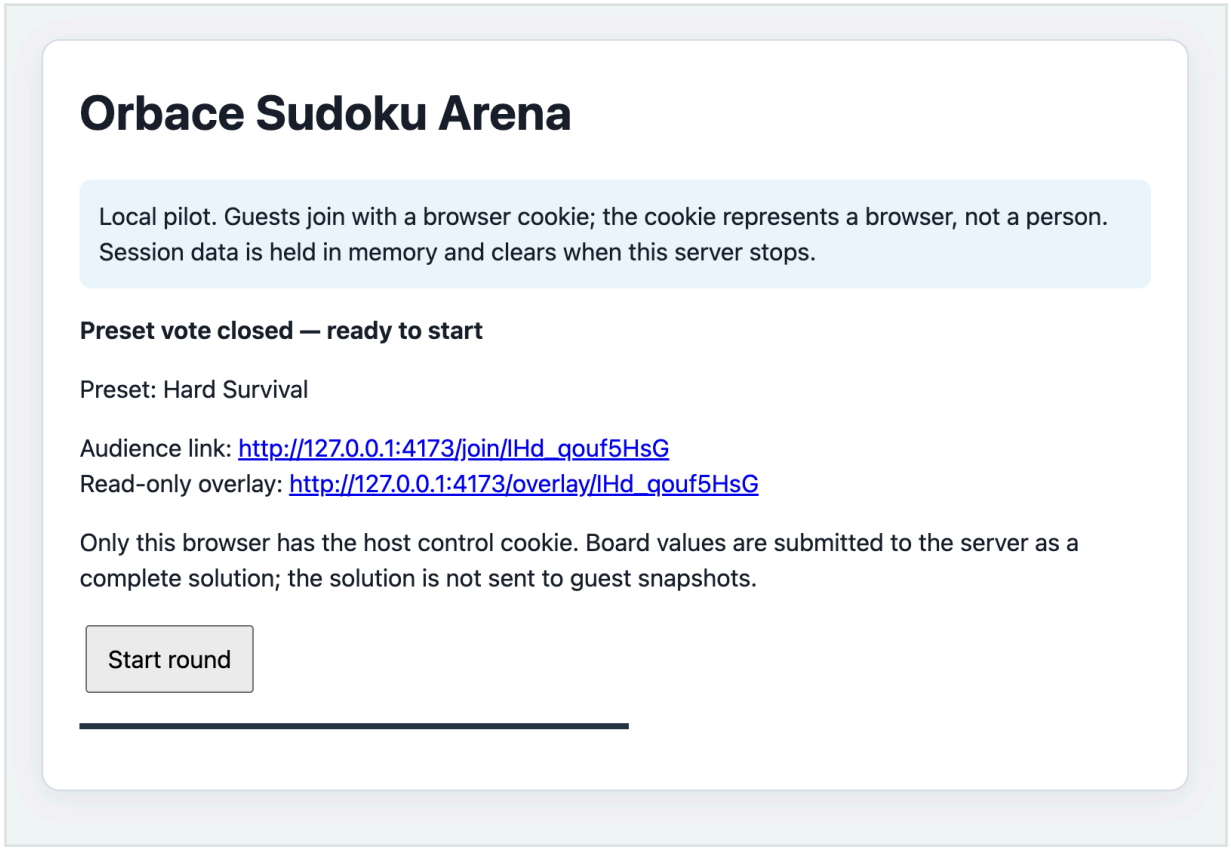

2. Start Arena:
   ARENA_ENABLED=true npm run arena:dev
3. Open http://127.0.0.1:4173.
4. Create a host session and copy the guest join link.
5. Open the link in an incognito window.
6. Guest votes for difficulty; wait 20 seconds. F
7. Host starts and solves the puzzle, or lets the timer expire.
8. Verify both windows display the same winner. F

Pass: One complete round with consistent results.

Step 3: issue: we have decided NOT to use easy, medium, hard but only the extreme

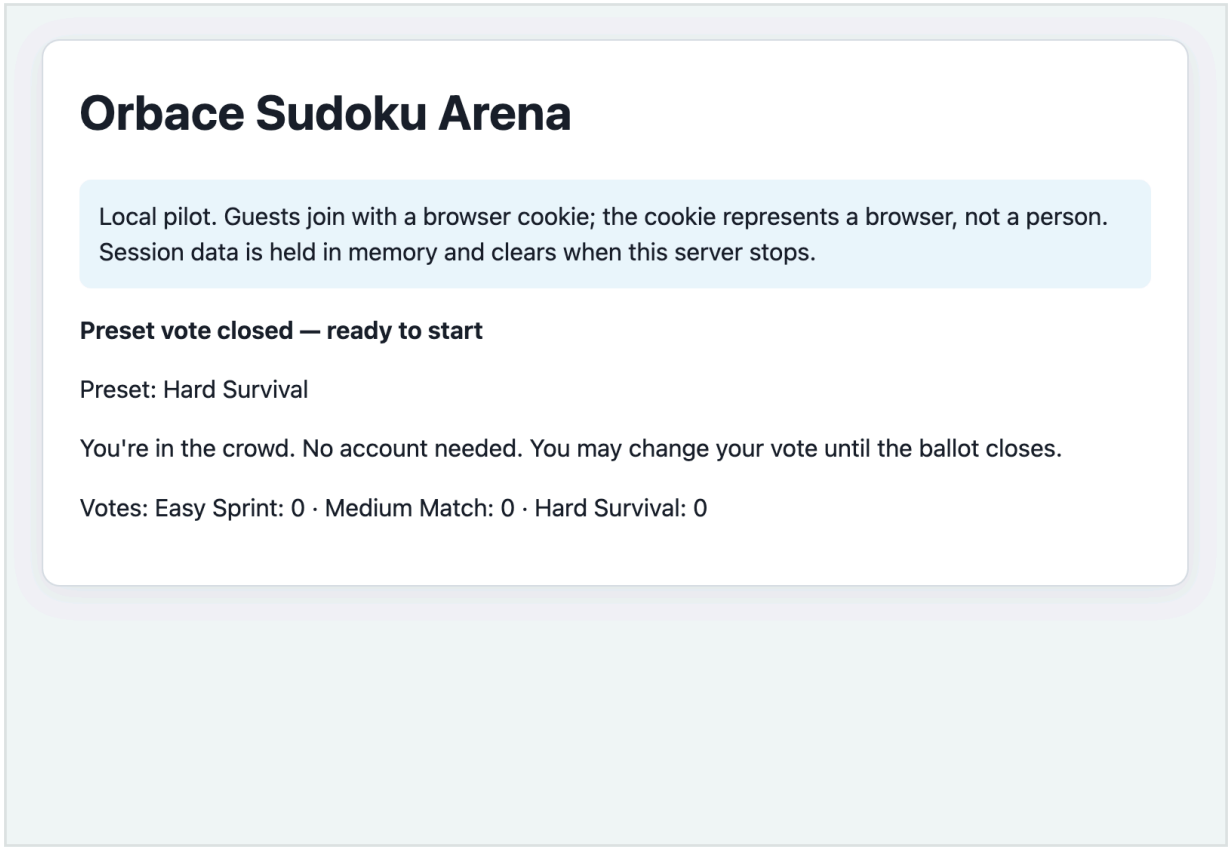

Step 4: created

Audience link: http://127.0.0.1:4173/join/lHd_qouf5HsG
Read-only overlay: http://127.0.0.1:4173/overlay/lHd_qouf5HsG

Step 5: How do I know I am in the crowd???

Step 6: there is no vote area

Step 7: game start without audience

Orbace Sudoku Arena

Local pilot. Guests join with a browser cookie; the cookie represents a browser, not a person. Session data is held in memory and clears when this server stops.

Round in progress

Time remaining: 7:46

Preset: Hard Survival

Audience link: http://127.0.0.1:4173/join/lHd_qouf5HsG
Read-only overlay: http://127.0.0.1:4173/overlay/lHd_qouf5HsG

Only this browser has the host control cookie. Board values are submitted to the server as a complete solution; the solution is not sent to guest snapshots.
